Fund Objective

The Fund seeks to achieve as high a level of current income as is consistent with the preservation of capital and the maintenance of liquidity.

Fund Strategy

In pursuit of this objective, the Fund's primary investments are repurchase agreements backed by U.S. government and government agency securities

Under normal market conditions, the Fund will seek to maintain a duration similar to that of a 1-Month U.S. Treasury Bill, but not to exceed that of a 3-month U.S. Treasury Bill.

Fund Highlights

The AMF Ultrashort Financing Fund is a no-load fund and does not qualify as a 2a-7 money market fund.

The Fund will seek to limit its investments and investment techniques so as to qualify as a permissible investment for nationally chartered banks and federal credit unions under current applicable federal laws and regulations.

Because the Fund primarily holds short-dated repurchase agreements, the dividend yield of the Fund is directly related to changes in short term interest rates.
